

N.G.S.R.S. PRASAD

Full Stack Developer — AI-Powered Systems — Offensive Cybersecurity Enthusiast
Konaseema, Andhra Pradesh

nallaprasad1212@gmail.com LinkedIn Github LeetCode GeeksforGeeks TryHackMe

SUMMARY

Final year Information Technology student skilled in Full Stack Development, Artificial Intelligence, and Offensive Cybersecurity. Experienced in building AI-powered web applications, secure backend systems, and machine learning based solutions using MERN Stack and Python. Proficient in penetration testing, Kali Linux, Bash scripting, REST API development, and scalable software design with strong problem-solving abilities.

EDUCATION

B.Tech – Information Technology Vishnu Institute of Technology, Bhimavaram CGPA: 9.24	2023 – 2027
Intermediate (MPC) Sri Chaitanya Junior College, Amalapuram Score: 95.6%	2021 – 2023
SSC S.S.R.Z.P.P High School Score: 94.3%	2019 – 2020

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, C, SQL
Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, Flask, REST APIs, JWT Authentication
Databases: MongoDB, MySQL
CyberSecurity Tools: Kali Linux and Tools
Developer Tools: Git, GitHub, Postman, VS Code, Linux, Bash Scripting
Productivity Tools: Microsoft Office, Excel, PowerPoint

PROJECTS

ScriptifyAI – Personalized Handwriting Generation System • Developed a full stack AI-powered application that converts digital text and documents into realistic handwritten-style notes. • Implemented personalized handwriting generation using character mapping techniques and dynamic rendering logic. • Designed an interactive interface for generating, previewing, and downloading handwritten documents.	GitHub
VulnX – Full Stack Vulnerability Assessment Platform • Developed a full-stack cybersecurity web application using React, Flask, and Python for real-time vulnerability assessment. • Implemented security header analysis, phishing URL detection, port scanning, and WHOIS intelligence lookup features. • Integrated AI-generated risk summaries with an interactive terminal-style dashboard UI. • Built scalable backend APIs for automated security analysis and threat detection workflows.	GitHub
Personal AI Assistant – Intelligent Document Interaction System • Currently developing an AI-powered personalized assistant capable of document interaction and contextual conversation. • Designing intelligent query handling and document-based response generation workflows. • Building scalable backend architecture for future AI memory and assistant integration.	GitHub

INTERNSHIPS

Ethical Hacking Virtual Internship – EduSkills
• Practiced penetration testing and vulnerability assessment using Kali Linux tools.
• Performed reconnaissance and network scanning using Nmap and Wireshark.

Palo Alto Cybersecurity Virtual Internship
• Learned network security, firewall configuration, and threat prevention concepts.
• Explored incident response and cybersecurity defense strategies.

ACHIEVEMENTS

- Solved 500+ coding problems across LeetCode and GeeksforGeeks focused on Data Structures and Algorithms.
- Ranked among top performers on TryHackMe through consistent cybersecurity practice.

CERTIFICATIONS

- **NPTEL – Cybersecurity and Privacy** — Network Security, Privacy, Secure Computing
- **GeeksforGeeks – DSA 360°** — Data Structures, Algorithms, Problem Solving
