

N.G.S.R.S. PRASAD

Full Stack Developer — AI Enthusiast — Cybersecurity Enthusiast

nallaprasad1212@gmail.com [LinkedIn](#) [Portfolio](#) [GitHub](#) [LeetCode](#) [GeeksforGeeks](#) [TryHackMe](#)

SUMMARY

Full Stack Developer specializing in MERN Stack, AI-powered applications, and cybersecurity solutions. Experienced in building scalable, secure, and user-centric software with a strong focus on solving real-world problems.

EDUCATION

B.Tech – Information Technology Vishnu Institute of Technology, Bhimavaram CGPA: 9.03	2023 – 2027
Intermediate (MPC) Sri Chaitanya Junior College, Amalapuram Score: 95.6%	2021 – 2023
SSC S.S.R.Z.P.P High School Score: 94.3%	2020 – 2021

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, C, SQL
Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, Flask, REST APIs, JWT Authentication
Databases: MongoDB, MySQL
CyberSecurity Tools: Kali Linux and Tools
Developer Tools: Git, GitHub, Postman, VS Code, Linux, Bash Scripting
Productivity Tools: Microsoft Office, Excel, PowerPoint

PROJECTS

ScriptifyAI – AI-Powered Handwriting Generation System - Developed a full stack AI-powered application that converts digital text and documents into realistic handwritten-style notes. - Implemented personalized handwriting generation using character mapping techniques and dynamic rendering logic. - Designed an interactive interface for generating, previewing, and downloading handwritten documents.	GitHub
VulnX – Full Stack Vulnerability Assessment Platform - Developed a full-stack cybersecurity web application using React, Flask, and Python for real-time vulnerability assessment. - Implemented security header analysis, phishing URL detection, port scanning, and WHOIS intelligence lookup features. - Integrated AI-generated risk summaries with an interactive terminal-style dashboard UI. - Built scalable backend APIs for automated security analysis and threat detection workflows.	GitHub
AI Assistant – Intelligent Document Interaction System - Developed an AI-powered document assistant that enables intelligent interaction with uploaded PDF documents. - Implemented AI-driven document summarization, contextual question answering, and efficient information retrieval. - Designed a responsive interface with secure document management and real-time AI-powered interactions.	GitHub

INTERNSHIPS

Ethical Hacking Virtual Internship – EduSkills - Practiced penetration testing and vulnerability assessment using Kali Linux tools. - Performed reconnaissance and network scanning using Nmap and Wireshark.
Palo Alto Cybersecurity Virtual Internship - Learned network security, firewall configuration, and threat prevention concepts. - Explored incident response and cybersecurity defense strategies.

ACHIEVEMENTS

- Solved 500+ coding problems across LeetCode and GeeksforGeeks focused on Data Structures and Algorithms.
- Ranked among top performers on TryHackMe through consistent cybersecurity practice.

CERTIFICATIONS

- NPTEL – Cybersecurity and Privacy** — Network Security, Privacy, Secure Computing
- GeeksforGeeks – DSA 360°** — Data Structures, Algorithms, Problem Solving
